Anand Singh

Linkedin: www.linkedin.com/in/anandsingh1105/ Email: anand01ts@gmail.com
GitHub: www.github.com/Anand-1105 Mobile: +91-8639392032

Skills

- **Languages**: Python, C, C++, Java, JavaScript, PHP, SQL
- **Frameworks**: React.js, Tailwind CSS, Vite, Node.js, Angular, shadcn-ui
- **Tools/Platforms**: Git, GitHub, Ubuntu (Linux), SQLite, PostgreSQL, AWS (S3, CloudFront)
- **Soft Skills**: Analytical thinking, Cross-functional collaboration, Ownership, Adaptability, Leadership

Internship

Infosys Since Jan 2026

ML Intern

- Implemented a device-level energy forecasting system using LSTM and Linear Regression, achieving ~90%+ prediction accuracy and reducing forecasting error by ~35% through advanced time-series modeling and feature engineering.
- **Tech stack**: Python, TensorFlow/Keras, Flask, Pandas, NumPy, Matplotlib, Scikit-learn

Yugayatra Retail | Certificate Nov 2025 –Jan 2026

SDE Intern

- Developed responsive UI components across 4+ platforms and optimized REST APIs with server-side pagination, improving page load speed by ~35% and accelerating data retrieval by ~50%.
- **Tech Stack**: React, Express, AWS, PostgreSQL

Projects

Everwo - University-Centric Social Platform | Link Since May 2025

- Engineered a scalable full-stack social platform using React and Supabase, supporting real-time posting, authentication, and community management, and onboarding 500+ users from 100+ universities within the first month.
- Enhanced data pipelines, database queries, and UI rendering workflows, improving cross-device platform responsiveness and feed load times by ~40%.
- **Tech Stack**: React.js, Tailwind CSS, shadcn-ui, Vite, Supabase (PostgreSQL, Auth, Realtime), Git, GitHub.

NeuralVitas — Deepfake Detection System | GitHub Feb 2025 - May 2025

- Developed a CNN-based deepfake detection model achieving ~94% accuracy, leveraging OpenCV-based preprocessing (frame extraction, face alignment) to improve input signal quality by ~30%.
- Tuned the training pipeline using data augmentation and hyperparameter tuning, reducing overfitting by ~25% and improving model generalization across unseen data.
- **Tech Stack**: Python, CNN, OpenCV, TensorFlow

Certificates

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate | Link Sept 2025
- Prompt Engineering and OpenAI — Columbia University | Link Sept 2025

Achievements

- **Ranked among the Top 25 in University Hackathon:** Apr 2025
  Among thousands of participants, developed AI/ML-based solutions and delivered a functional prototype under competitive, time-bound constraints.
- **Research Paper Accepted in JETNR Journal:** Oct 2024
  Research on *Dynamic Memory Management in Modern Operating Systems*, contributing analytical insights into memory allocation optimization.

Education

Lovely Professional University Phagwara, Punjab

Bachelor of Technology - Computer Science and Engineering *Since August 2023*

Delhi Public School Nacharam, Hyderabad

Intermediate *April 2021 - April 2023*

Delhi Public School Nacharam, Hyderabad

Matriculation *March 2020 - March 2021*
